Information   Changelog   Stats

Have you experienced some kind of major bug in a plugin? Did your save game got corrupt or have you lost all your ribbons in FinalFrontier, because of a single stupid mistake the developer (who is me unfortunately) has made? No? Well, you are lucky then. If you have experienced this, S.A.V.E may come to rescue. This plugin will handle automatic backups of your save games for you to prevent loss of data.
